

# Explore Engineering Day for Women!

Friday, November 12, 2010 9:00 a.m. to 2:30 p.m

Learn about engineering opportunities at CU Boulder  
for high school women

## Why engineering at CU Boulder?

Simple! You cannot get a better engineering degree in the Rocky Mountain Region than at CU-Boulder's College of Engineering and Applied Science! The college is ranked 32nd overall and 18th among public universities. The aerospace and environmental engineering programs at CU-Boulder are ranked 10th and 11th respectively among public undergraduate programs.

CU students give back to their communities in other ways, too; we have the second highest number of students in the nation who serve as Peace Corps Volunteers. And, in 2002 they founded Engineers Without Borders, now with more than 300 chapters worldwide. CU engineers truly shape the future!

## How do I participate?

Register online at <http://tinyurl.com/2fgzupk>

Arrive at the CU-Boulder campus Discovery Learning Center lobby by 9:00 a.m. to check in.
